

Bachelor of Dental Surgery

Why study BDS?

There are various reasons why students choose this course to build their career. Some of the benefits of the program are listed below:

- Due to increasing awareness about oral hygiene, the number of dental patients has also increased in the nation. In order to treat these patients, one must have a BDS degree, as in India it has been established that one can practice dentistry only after completing BDS. Job opportunities will increase in the near future, says Manawarkar. • Reason, dentists and doctors

There has been a rapid increase in numbers and the government aims to provide better job opportunities to dentists by increasing job opportunities. • Scholars who earn more than what is available in India can practice their skills in countries like USA and Canada.

- However, for this, they are in selections like NBDE or NDEB
The research should be done.

Duration

BDS (Bachelor of Dental Surgery) is a 5-year undergraduate course and the only recognized professional dental course in India. After BDS course, Manavargarh became a doctor. It is a compulsory course for students who want to work as dentists in government or private hospitals. BDS focuses on training students for key dental sciences and surgeries. The 5-year program includes 4 years of classroom education and 1 year of academically rotating internship.

BDS Eligibility Criteria

In India, it is mandatory for students to qualify for 10+2 examination or equivalent degree course with minimum 50% marks from a recognized institution for admission to BDS courses. Only one entrance examination is conducted across India for general public. Entrance Test called National Eligibility and Entrance Test (NEET) is conducted once a year as a national level test.
